How to Use Pedometers in PE with Bob Pangrazi

Learn how to effectively use pedometers in your classes. All details will be covered including how to number your pedometers, upload class lists quickly into the FITstep Pro software, upload data, and create comprehensive reports for students, administrators, and parents. Also included will be a discussion of why activity monitoring is a necessary component of a quality physical education program. Tune in and learn all you wanted to know about best practices and suggested activities.
